

The Australian energy sector is dynamic and ever changing. For progressive organisations to respond effectively, **a trusted project partner is a must.**

AND Network works in partnership with our clients to provide project management services across the full project lifecycle from concept to execution.

We are solely dedicated to delivering power projects meaning we possess an unmatched level of deep, practical knowledge from which our clients benefit.

We pride ourselves on our engineering capabilities combined with solid processes and management skills resulting in projects delivered on time and budget.

This experience has been derived from our experience overseeing complex projects at all scales allowing us to deliver both efficient and innovative solutions.

With extensive networks across the energy sector, we also work closely with leading manufacturers, consultants and contractors and liaise with them to ensure our clients receive the best project outcomes.

AREAS OF EXPERTISE

SOLAR PLANTS

ELECTRICAL DISTRIBUTION

BATTERY ENERGY STORAGE SYSTEM

ELECTRIC VEHICLE INFRASTRUCTURE

GENERATORS

SCADA & MICROGRIDS

PREFABRICATED, TERMINAL & ZONE SUBSTATIONS

STANDARDS & REGULATION

OUR VALUES

QUALITY

We strive for excellence in everything we do and consistently work to exceed our clients' expectations

OWNERSHIP

We are always accountable for our projects and to our clients to provide them with complete peace of mind

SUSTAINABILITY

We believe in minimising our environmental footprint and support our clients to achieve their sustainability goals

PERSEVERANCE

We are dedicated and determined to achieve outstanding project outcomes on behalf of our clients

OUR PEOPLE

AND Network is led by Nick Jones and Arnaud Marois who are supported by a team of industry experts.

NICK JONES | PROJECT DIRECTOR

Brings experience from across the energy industry overseeing complex power projects within the utility, infrastructure and construction sectors and leading both small and large teams.

ARNAUD MAROIS | TECHNICAL DIRECTOR

Over 20 years of engineering experience in Australia, Europe and Asia leading large scale projects across the energy and construction sectors as a consultant and project manager.

SKILLS & CAPABILITIES

PROJECT MANAGEMENT	DECARBONISATION	TECHNICAL ADVISORY
Project brief	Emissions reduction	Concept studies
Planning and permits	Distributed generation	Technology selection
Procurement strategy	Network augmentation	Technical reviews
Tenders and evaluations	Microgrids	Safety in Design
Contract administration	Certificates management	Customised standards
